

5th Anniversary of VetCO Academy

Dear Colleagues!

This year VetCo is celebrating the 5th anniversary of its educational mission. From the very beginning we have been promoting and implementing the concept of lifelong learning for veterinarians and thus meeting the recommendations of the Polish National Veterinary Chamber.

Until now, we have organized over 30 international conferences, dozens of courses and workshops. We have had a pleasure to host 55 outstanding experts and specialists from more than 30 leading American and Canadian universities and clinics.

To meet your current expectations, on 2017 we are organizing eleven conferences and workshops on various disciplines of small animal veterinary medicine. As our participants represent a constantly increasing level of expertise our conferences will also have the level of difficulty raised, which is guaranteed with our supreme keynote speakers, who share their great practical experience with attendees.

We hope that our conferences will benefit veterinarians and their patients with top-end knowledge, diagnostics and treatment.

See you at VetCo!

Marcin Suszyński

DVM, MPVM

Who we are?
